

# Next Generation Science Standards

[Frequently Asked Questions](#)

[Next Generation Science Standards](#)

*A foundation in scientific literacy prepares students to be confident and capable life-long learners who are equipped with the skills needed to access, understand, evaluate and apply information in various contexts. Regardless of their academic standing, all students should have access to a rich and challenging science curriculum that will promote scientific literacy, while inspiring and supporting advanced study and science –related careers.*

*~Ct State Department of Education website*

Bethel Public Schools implement the Next Generation Science Standards for all K-12 students.
